Give your infrastructure the agility to evolve.

Evolution beats revolution.

Learn how to end the juggling act over costs, growth needs, and risks. Unisys and Intel recognize that change for its own sake merely propagates more change. Evolution propagates progress. In these free local seminars and webinars, learn how to take control and align your business vision with an intelligently evolving technology infrastructure.

Executive Seminar: In a World of Change, the Intelligent Evolve

Enterprises need IT to drive growth and help cope with change. Yet 70% to 80% of IT budgets are used to maintain and operate the current infrastructure. This half-day seminar for CIOs and senior IT executives will help you determine your location on the IT evolution curve. We'll help you identify the next steps you should take to leverage new technology solutions from Unisys and Intel. You'll gain insight into your current infrastructure and learn how to solve the "IT Paradox" and transform IT from a cost to a profit center.

Executive Round Table Seminar Schedule

Chicago, IL – Tuesday, June 6
New York City, NY – Thursday, June 8
Los Angeles, CA – Tuesday, June 20
Washington, DC – Thursday, June 22
Atlanta, GA – Wednesday, June 28
Columbus, OH – Thursday, June 29

*Dates and locations are subject to change.

Survival belongs to the fittest.

Those who win are those who act on opportunities and respond quickly to threats. Armed with the information from these free seminars and webinars, you're ready. You'll learn how to gain the agility and the vision to maximize your advantage in the data center and in the marketplace.

Webinar #1: In a World of Change, the Intelligent Evolve

Sixty percent of senior executives say the complexity of IT actually inhibits growth and is one of the most difficult aspects of business to change. Join this one-hour session to learn how Real-Time Infrastructure (RTI) can break the IT bottleneck, creating a more adaptive infrastructure. Discover how RTI improves business agility and quality of service and lowers overall IT cost.

Wednesday, June 14; 12 PM EST

Webinar #2: Evolving into the Bank of the Future

Banks are facing the need to renew their operating models to be able to address evolving customer needs, changing regulatory requirements, and increasing competitive pressures. The Right Time Visible Bank (RTVB) model guides banks through the complex undertaking of core banking transformation. RTVB is an end-to-end business and technical architecture. It enables banks to adapt "right time" to changing business needs and customer requirements. Learn how to evolve your financial institution using the RTVB model.

Wednesday, June 28; 2 PM EST

Webinar #3: Business Responsiveness through Outsourcing

This one-hour session examines how Real-Time Infrastructure and Outsourcing improves business responsiveness in IT operations through the integration of business process monitoring and optimized infrastructure management. A review of current and future capabilities in virtualization, automated provisioning, workload management, and disaster recovery will be covered. We'll also look at how the implementation of Web services and Service-Oriented Architecture create positive business impact through infrastructure strategy and planning.

Wednesday, July 12; 4 PM EST

Webinar #4: Evolving Your Enterprise through Open Source

The emergence of Real-Time Infrastructure (RTI) creates an environment where servers, storage, and networks can be virtualized, shared, and dynamically allocated across the enterprise or workgroups—all based on defined business priorities. The combination of RTI and Open Source operating environments and applications can create a virtualized environment that addresses the critical infrastructure requirements of businesses. This webinar reviews the business and technology implications of Open Source and RTI for the evolving enterprise.

Wednesday, July 26; 2 PM EST

Webinar #5: Corporate Performance Management Strategies

Corporate Performance Management (CPM) describes the methodologies, metrics, processes, and systems used to monitor and manage an enterprise's business performance. Real-Time Infrastructure (RTI) components, such as data warehousing, provide the foundation upon which high-impact strategic business intelligence applications can be delivered. Discover how RTI and CPM solutions enable your performance management objectives and improve your ROI.

Wednesday, August 9; 12 PM EST

Webinar #6: Begin the Evolution—Building Blocks for a New Infrastructure

Real-Time Infrastructure sounds a lot like IT Nirvana. IT resources are available when needed, problems are solved automatically, and IT is seamlessly aligned with the business priorities of the enterprise. Join this final webinar to learn the practical steps you can take to evolve a new IT paradigm—on the road to a Real-Time Infrastructure.
